

Basic Detail Report

Title Wood and Polychrome Glass Window with Geometric Motifs

Date 19th century

Basic Detail Report

Medium Glass, wood

Description Vivid colored glass windows were popular during the Safavid and Qajar dynasties of Iran. These windows, called orosi, are composed using a technique called gereh-sāzī, meaning “knot-making, in which colored glass is set in a lattice frame composing an intricate, geometric pattern.” Orosi windows feature in both religious and vernacular architecture, found in mosques, madrasas (schools), and private residences. One of the most spectacular examples of orosi in Qajar architecture is the Nasir al-Mulk Mosque (also known as the Pink Mosque) in Shiraz, Iran where the multicolored glass creates mosaics of light throughout the interior.

Dimensions Overall: 56 1/2 x 47 7/16 in. (143.5 x 120.5cm)
